

1		WORK FOR INFOCOMM TECHNOLOGY APPLICATIONS SUPPORT ENGINEER			
Sector	Infocomm Technology				
Track	Operations and Support				
Sub-track	Applications Support				
Occupation	Applications Support Engineer				
Job Role	Applications Support Engineer				
Job Role Description	software applications, which may understanding of the application processes and provides necess application users and setting up. He works in a team setting and required by the organisation. He are deployed.				
	The Applications Support Engineer uses critical thinking skills to identify and solve problems. He is passionate about analysing and resolving problems, and addressing technical challenges. He also possesses strong interpersonal skills.				
	Critical Work Functions	Key Tasks			
	Provide software support	Develop operational software configuration management plans			
		Manage the maintenance of Commercial Off-the-Shelf (COTS) and other software technologies to maintain currency			
		Oversee software help desk activities			
		Develop software retirement procedures			
		Acquire tools to facilitate the analysis of operational data			
	Manage software maintenance	Implement software maintenance processes and plans			
		Conduct technical impact analysis and problem identification			
		Develop plans to make corrective, adaptive and perfective changes to software			
Critical Work		Develop plans to make corrective, adaptive and perfective changes to			
Critical Work Functions and		Develop plans to make corrective, adaptive and perfective changes to software			
	_	Develop plans to make corrective, adaptive and perfective changes to software Manage preventative maintenance and software re-engineering activities			
Functions and	_	Develop plans to make corrective, adaptive and perfective changes to software Manage preventative maintenance and software re-engineering activities Monitor and analyse software maintenance activities Develop software transition plans and identify stakeholders for transition and			
Functions and	_	Develop plans to make corrective, adaptive and perfective changes to software Manage preventative maintenance and software re-engineering activities Monitor and analyse software maintenance activities Develop software transition plans and identify stakeholders for transition and operational requirements			
Functions and	_	Develop plans to make corrective, adaptive and perfective changes to software Manage preventative maintenance and software re-engineering activities Monitor and analyse software maintenance activities Develop software transition plans and identify stakeholders for transition and operational requirements Modify existing and develop new software operational standards			
Functions and	maintenance	Develop plans to make corrective, adaptive and perfective changes to software Manage preventative maintenance and software re-engineering activities Monitor and analyse software maintenance activities Develop software transition plans and identify stakeholders for transition and operational requirements Modify existing and develop new software operational standards Develop software activation and check-out procedures			
Functions and	maintenance	Develop plans to make corrective, adaptive and perfective changes to software Manage preventative maintenance and software re-engineering activities Monitor and analyse software maintenance activities Develop software transition plans and identify stakeholders for transition and operational requirements Modify existing and develop new software operational standards Develop software activation and check-out procedures Lead software operational training			
Functions and	maintenance	Develop plans to make corrective, adaptive and perfective changes to software Manage preventative maintenance and software re-engineering activities Monitor and analyse software maintenance activities Develop software transition plans and identify stakeholders for transition and operational requirements Modify existing and develop new software operational standards Develop software activation and check-out procedures Lead software operational training Develop training materials for operational support personnel			
Functions and	maintenance	Develop plans to make corrective, adaptive and perfective changes to software Manage preventative maintenance and software re-engineering activities Monitor and analyse software maintenance activities Develop software transition plans and identify stakeholders for transition and operational requirements Modify existing and develop new software operational standards Develop software activation and check-out procedures Lead software operational training Develop training materials for operational support personnel Determine the impact of software changes on the operational environment			
Functions and	maintenance	Develop plans to make corrective, adaptive and perfective changes to software Manage preventative maintenance and software re-engineering activities Monitor and analyse software maintenance activities Develop software transition plans and identify stakeholders for transition and operational requirements Modify existing and develop new software operational standards Develop software activation and check-out procedures Lead software operational training Develop training materials for operational support personnel Determine the impact of software changes on the operational environment Lead software diagnostics and real-time debugging and/or troubleshooting			

	SKILLS TULLE SG AUTHORITY					
		Specify test cases for the selected testing technique				
		Analyse defect arrival ra	te and failure intensity data			
		Develop maintenance plans including timelines and resources needed				
		_	ntenance and update of an existin	g software and/or		
		Provide high-level moni	itoring of security measures, prop	nality and process flowing of security measures, proper registration of		
		passwords and other ac		aroad perepoetive to		
	platform solutions	Solve unique and highly complex problems by taking a broad perspective to dentify solutions				
		Anticipate internal and/or external business challenges and/or regulatory issues				
		Oversee the maintenance of technical documentation of technical architecture, code changes, issue resolutions and procedures				
		Collaborate with external stakeholders and vendors to resolve problems				
		Manage the development of service-level objectives and targets				
	Oversee service level agreements and service improvements	Monitor service-level objectives to ensure that requirements are met or exceeded				
		Develop client satisfaction metrics and service procedures				
		Propose recommendations to improve performance and client satisfaction				
Skills and Competencies	Technical Skills and C	Competencies	Generic Skills and Competencies			
	Applications Development	Level 3	Communication	Intermediate		
	Applications Integration	Level 3	Interpersonal Skills	Intermediate		
	Applications Support and Enhancement	Level 3	Problem Solving	Basic		
	Configuration Tracking	Level 3	Service Orientation	Basic		
	Customer Experience Management	Level 3	Teamwork	Intermediate		
	Cyber and Data Breach Incident Management	Level 3				
	Process Improvement and Optimisation	Level 3				
	Problem Management	Level 3				
	Procurement	Level 3				
	Service Level Management	Level 4				
	Software Configuration	Level 3				
	Software Testing	Level 3				
	Stakeholder Management	Level 4				
	Test Planning	Level 4
